

**To: U.S. House of Representatives  
June 27, 2006**

The Citizens for Space Exploration (CSE) -- a grassroots advocacy group of taxpayer citizens -- endorses the Vision for Space Exploration and urges members of the House to oppose any amendments to reduce the NASA budget during consideration of the FY07 Science, State, Justice and Commerce Appropriations Bill. Funding for NASA and space exploration advances America's scientific, technological, security and economic interests. For more information about CSE go to <http://citizensforspaceexploration.org/>
